Use cases

   Virtual Register user

Actors	Virtual User
Entry condition	No entry condition
Events flow	The user opens the Clup CLup app on his smartphone and clicks on the *"Create account"* button. The user fills all the mandatory fields. The user clicks on the *"Confirm"* button. The user receives a notification confirming the registration.
Exit condition	Virtual User's data are saved into the database and the registration terminates successfully
Exceptions	The user chooses an already registered username or email The user does not fill one or more mandatory fields The use inserts not valid information in one or more fields For all the exceptions the system notifies the user that an error occurred. The *Events flow* starts again from point 2.

Actors	User
Entry condition	The user is already in the Clup app homepage

Virtual *Get a* *virtual*	Events flow	If the user wants to access Clup services anonymously then he clicks on the *"Anonymous user"* button, otherwise he inserts username and password, then he clicks on the *"Login"* button. **The user selects the *"Get virtual ticket"* button.** The system redirects the user to a page where he can select the time or the market where he would want to go (from a map): If the user selects the time, the system provides through the map only the available market. If the user selects a market from the map, the system provides a list of available times. The user completes the procedure either selecting a market from the map (case a) or a time (case b), then he clicks on the *"Confirm"* button. The system notifies the user that the procedure has been successfully managed. The system sends to the user the virtual ticket with the QR code to enter the market.
	Exit condition	The user successfully receives the virtual ticket
	Exceptions	The user clicks on the *"Login"* button but either the username or the password is wrong. The system notifies the user about the error. The *Events flow* starts again from point 1

A)

B.1)   *Use Cases*

B.1.1)   *Virtual User's registration*

Actors	Virtual User
Entry condition	No entry condition
Events flow	1) The user opens the CLup app on his smartphone and clicks on the *"Create account"* button. 2) The user fills all the mandatory fields. 3) The user clicks on the *"Confirm"* button. 4) The user receives a notification confirming the registration.
Exit condition	Virtual User's data are saved into the database and the registration terminates successfully
Exceptions	1) The user chooses an already registered username or email 2) The user does not fill one or more mandatory fields 3) The use inserts not valid information in one or more fields For all the exceptions the system notifies the user that an error occurred. The *Events flow* starts again from point 2.

B.1.2)   Virtual User's Login

Actors	Virtual User
Entry condition	The virtual user is already into the CLup app homepage
Events flow	1) If the user wants to access CLup services anonymously then he clicks on the *"Guest"* button, otherwise he inserts username and password into the *"Username"* and *"Password"* fields, respectively. 2) The user clicks on the *"Login"* button. 3) The system redirects the user to the CLup app homepage
Exit condition	The virtual user is successfully redirected to the CLup app homepage
Exceptions	1) The virtual user clicks on the "Login" button but either the username or the password is wrong. The system notifies the user about the error. The Events flow starts again from point 1.

B.1.3)   *Get Virtual Ticket*

Actors	Virtual User
Entry condition	The virtual user is already logged into CLup app

Events flow	1) The virtual user selects the *"Get virtual ticket"* button.
	 2) The system redirects the user to a page where he can select the time or the market where he would want to go (from a map):
	   a) If the user selects the time, the system provides through the map only the available market.
	   b) If the user selects a market from the map, the system provides a list of available times.
	 3) The user completes the procedure either selecting a market from the map (case a) or a time (case b), then he clicks on the *"Confirm"* button.
	 4) The system notifies the user that the procedure has been successfully managed.
	 5) The system sends to the user the virtual ticket containing:
	   a) The user's selected time.
	   b) The market's name and address.
	   c) The QR code to enter the market.

Exit condition	The user successfully receives the virtual ticket.
Exceptions	

B.1.4) Book Visit

Actors	User
Entry condition	The user is already logged into CLup app
Events flow	1) The user selects the *"Book a visit"* button.
	2) The system redirects the user to a page where she can select the time or the market where she would want to go (from a map):
	c) If the user selects the time, the system provides through the map only the available market.
	d) If the user selects a market from the map, the system provides a list of available times.
	3) The user selects either a market from the map (case a) or a time (case b), then she clicks on the *"Confirm"* button.
	4) The system redirects the user to a page where she can indicate the approximate expected duration of the visit the exact list of items and the categories of items she intends to purchase.
	5) The user optionally fills the previous fields, then clicks on the *"Confirm"* button.
	6) The system notifies the user that the procedure has been successfully managed.
	7) The system sends to the user the virtual ticket containing:
	a) The user's selected time.
	b) The market's name and address.
	c) The QR code to enter the market.
Exit condition	The user successfully receives the virtual ticket.
